

Maximize Your Home Energy Savings With Solar!

Passive Solar Water Heating Systems & Bosch Tankless Water Heater - as backup

NEW! 30% Federal Tax Credit on Complete System!

Passive Solar Water Heater
Integrated Collector Storage ICS

Benefits:

- Energy Savings of up to 70%
- No more high gas and electric bills for water heating
- 30% Federal Tax Credit on installed system cost
- Endless supply of hot water with on-demand heater

Features:

- Passive solar water heater is a self-contained, single unit system (solar collector & 40 gal storage tank combined)
- No pumps, controls, mechanical or electric components required
- Solar pre-heats water to instantaneous water heater
- Bosch AquaStar Model 125 BS, with thermal efficiencies of 80%, enhances efficiency of solar. Delivers up to 4.7 GPM at 45° rise.
- Requires only local water pressure & solar radiation to operate

Maximize Your Home Energy Savings With Solar!

Passive Solar Water Heating Systems
Complete 40 gal Solar Hot Water System

NEW! 30% Federal Tax Credit on Complete System!

Passive Solar Water Heater
Integrated Collector Storage ICS

Benefits:

- Energy Savings of up to 70%
- Eligible for 30% Federal Tax Credit
- Ideal for households looking to maximize energy savings

Features:

- Passive solar water heater is a self-contained, single unit system that integrates the solar collector and 40 gal storage tank
- It functions as a pre-heater to an instantaneous water heater
- Requires only local water pressure and solar radiation to operate
- No pumps, controls, mechanical or electrical components required
