

Drawings Provided by Solar Depot

Solar Depot has developed a generic version of one line drawings for the Sol-Gen systems we sell.

Requests for drawing come through your Solar Depot Sales Rep.

Ask them for the drawing after the sales contract is signed by your client and your quote is approved by you and converted to an order.

Please completely fill out the Residential Drawing Request form and send to you Solar Depot Sales Representative once the sale is confirmed and you are going ready to apply for the permit.

If more information is provided, more details can be included on the drawing when required by the AHJ.
