

November 6, 2009

Dear Evergreen Solar Customer,

We certify that all of our ES-A solar panels are made at our 160MW capacity manufacturing facility in Devens, Massachusetts. We also certify that all Evergreen Solar ES-A solar panels qualify as *manufactured product produced in the United States* as part of the **Buy American Requirement under Section 1605 of the American Recovery and Reimbursement Act of 2009.**

You should also be interested to know that our proprietary wafer manufacturing technology for String Ribbon products was invented in the United States at the Massachusetts Institute of Technology and continues to be developed and enhanced by Evergreen Solar in Massachusetts.

You can be proud that when you buy Evergreen Solar ES-A solar panels, you are buying from an American company that is one of the largest providers of solar manufacturing jobs in the United States.

Please feel free to contact me if you have any further questions.

Sincerely,

A handwritten signature in black ink that reads "Alan King". The signature is written in a cursive style with a large, looped "A" and "K".

Alan King
